Proficient

PROFESSIONAL SUMMARY

Full Stack Software Engineer with expertise spanning the complete development lifecycle — from crafting dynamic, responsive frontends with **React.js** and **Tailwind CSS** to engineering robust backend systems with **Node.js**, **Express.js**, and RESTful APIs. Experienced in designing and deploying production-grade e-commerce platforms, a feature-rich Learning Management System, and an IoT-powered soil intelligence solution — each built end-to-end from architecture through live deployment. Proficient across **Python**, **FastAPI**, **MongoDB**, and **MySQL**, with additional expertise in embedded systems engineering. Hackathon First-Place winner with a deep commitment to clean architecture, elegant code design, and building software that solves real-world problems with precision.

**Core Stack:** React.js · Node.js · Express.js · MongoDB · Python · JavaScript · REST APIs · JWT Authentication · MySQL · Git

EDUCATION

B.Sc. Computer Science

2023 – 2026

St. Joseph College (Autonomous), Tiruchirappalli

Expected 2026

Bharathidasan University · Tamilnadu, India

CGPA: 8.5 / 10 · Department First Rank · Semester 1 – 5

Academic Excellence Award

Relevant Coursework: Data Structures & Algorithms · Database Management Systems · Computer Networks · Operating Systems · Software Engineering

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

May 2025 – Present

FrontierWox.in · Tech Startup — Developer Tools & Web Platforms · Tamilnadu, India

- Refactored and optimized the main company website using **React.js**, improving UI responsiveness and Lighthouse performance scores through component restructuring, lazy loading, and CSS optimization.
- Engineered a production-grade full-stack **Resume Builder** using **React.js**, **Tailwind CSS**, **JavaScript**, and **PHP** — with dynamic multi-template rendering and one-click PDF export, actively deployed and used in production at FrontierWox Tech.

PROJECTS

FWT Izon – Learning Management System (LMS)

Apr 2026 – Present

Coursera-Style E-Learning Platform · FrontierWox Tech · 300+ Active Students

MERN Stack · JWT Authentication · REST APIs · Payment Gateway · AI Recommendations

- Architected and deployed a full-stack LMS actively used by **300+ students**, featuring course creation, video lessons, quizzes, live classes, progress tracking, and automated certificate generation using the **MERN stack**.
- Implemented JWT-based authentication, role-based access control, and payment gateway integration with dedicated dashboards for instructors and learners.
- Optimised **MongoDB** schemas and **Node.js** API routes to handle **300+ concurrent student sessions** with consistent uptime and low-latency response times.

HoloFind-X – AR Indoor Navigation System

Mar 2026 – Apr 2026

Offline Mobile App for Object Tracking & Spatial Mapping

React Native · Kotlin · YOLOv8n ML · SQLite · VPS

- Engineered a fully offline AR indoor navigation mobile application using **React Native** and **Kotlin**, allowing users to find lost objects through spatial mapping and a custom Visual Positioning System (VPS).
- Integrated a localized **YOLOv8n** machine learning model for real-time object identification and securely stored mapping coordinates in an offline **SQLite** database for instant retrieval.

- Chess
- Emerging Technologies
- Story-Driven Games

E-Commerce Platform – Saree Shop

Jan 2026 – Feb 2026

Full-Stack MERN E-Commerce Application

MERN Stack · JWT Authentication · REST APIs · VPS · Nginx

- Built and deployed a full-stack e-commerce application for a Saree retail business using the **MERN stack**, with JWT authentication, product catalog management, shopping cart, and order processing APIs.
- Orchestrated end-to-end VPS deployment with Nginx reverse proxy, **MongoDB** integration, and Git-based version control — delivering a live, production-ready storefront.

E-Commerce Platform – Book Store

Feb 2026

Scalable Online Bookstore with Full-Stack Architecture

MERN Stack · MongoDB · RESTful APIs · Responsive UI

- Developed a responsive Book Store platform with full-text product search, category filtering, shopping cart, and streamlined checkout — optimised for mobile and desktop.
- Engineered **RESTful APIs** for authentication, catalog management, and order processing; designed optimised **MongoDB** schemas for efficient querying across large product listings.

ElectroPlant-X – Living Soil Intelligence System

Jan 2026 – Feb 2026

Solar-Powered IoT Soil Health Monitoring Platform

ESP32 · Embedded C/C++ · Multi-Sensor Integration · OLED Display · IoT Firmware

- Designed and built a solar-powered **IoT monitoring system** integrating 5+ environmental sensors to measure soil moisture, temperature, pH, and plant bio-signals in real time.
- Developed an **ESP32-based data fusion engine** computing a composite Soil Alive Index for smart irrigation decisions, with OLED display feedback and a web-based remote monitoring dashboard.

LEADERSHIP & INITIATIVES

Technical Session Presenter

Sep 2025

Mastering AI: Prompt Engineering & Human Insight · St. Joseph College (Autonomous), Tiruchirappalli

- Conducted a technical session on **Prompt Engineering** and responsible AI practices for students, delivering live AI tool demonstrations and practical guidelines — recognised by faculty for depth of content and clarity of delivery.

AWARDS & HONOURS

1st Place – St. Joseph College Hackathon 2025

Aug 2025

Built a **Trichy Local Farmers Connect Platform** linking farmers, producers, and consumers for fair-price direct sales — selected as the top project from all competing teams at St. Joseph College (Autonomous).

Outstanding Student Award – Department First Rank

Dec 2023

Achieved Department First Rank consistently across Semester 1 through Semester 5 · St. Joseph College (Autonomous), Tiruchirappalli

CERTIFICATIONS & COURSES

Project Execution: Running the Project

Feb 2026 – Present

Google · Coursera

Programming in Java

Jul 2024 – Nov 2024

NPTEL · IIT

Data Science for Engineers

May 2023 – Sep 2023

NPTEL · IIT
