PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with hands-on experience designing, developing, and deploying scalable web applications using **React.js**, **Node.js**, **Express.js**, and **MongoDB**. Proven ability to build production-ready platforms — including a Coursera-style LMS, multiple e-commerce systems, and an IoT intelligence solution. Consistent academic achiever (Department First Rank, Semesters 1–5) with a strong foundation in computer science, clean code principles, and performance-driven engineering. Eager to contribute to innovative, high-impact products in a collaborative team environment.

EDUCATION

B.Sc. Computer Science

2023 – 2026

St. Joseph College (Autonomous), Tiruchirappalli

Expected 2026

Affiliated to Bharathidasan University · Tamilnadu, India

Department First Rank · Semester 1 – 5

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

May 2025 – Present

FrontierWox.in · Tamilnadu, India

- Refactored and optimized the main company website, significantly improving UI responsiveness, page load performance, and overall user experience using **React.js** and modern CSS best practices.
- Engineered a production-grade full-stack **Resume Builder** web application using **React.js**, **Tailwind CSS**, **JavaScript**, and **PHP** with dynamic multi-template rendering and one-click PDF export — deployed and actively used in production at FrontierWox Tech.

PROJECTS

FWT Izon – Learning Management System (LMS)

Apr 2026 – Present

Coursera-Style E-Learning Platform · FrontierWox Tech

MERN Stack · JWT · REST APIs · Payment Gateway · AI Recommendations

- Architected a comprehensive **Learning Management System** using the **MERN stack**, featuring course creation, video lessons, quizzes, live classes, AI-powered recommendations, learner progress tracking, and automated certificate generation.
- Designed and implemented secure **RESTful APIs** for JWT-based authentication, course enrollment, payment gateway integration, and real-time analytics, with a role-based admin dashboard for instructors and learners.
- Built scalable **MongoDB** data models and **Node.js** backend services supporting high-concurrency usage with optimized query performance and reliable system uptime.

E-Commerce Platform – Saree Shop

Jan 2026 – Feb 2026

Full-Stack MERN E-Commerce Application

MERN Stack · JWT Authentication · REST APIs · VPS · Nginx

- Built and deployed a full-stack e-commerce application for a Saree retail business using the **MERN stack**, with secure JWT authentication, product catalog management, shopping cart, and order processing APIs.
- Managed complete end-to-end deployment including **MongoDB** integration, VPS server configuration, Nginx reverse proxy setup, and Git-based version control workflow.

E-Commerce Platform – Book Store

Feb 2026

Scalable Online Bookstore with Full-Stack Architecture

MERN Stack · MongoDB · RESTful APIs · Responsive UI

- Developed a scalable, responsive Book Store platform enabling users to search, browse, and purchase books with an intuitive UI and streamlined checkout experience.
- Engineered **RESTful APIs** for authentication, product catalog, shopping cart, and order management; designed optimized **MongoDB** schemas for reliable, efficient end-to-end transactions.

ElectroPlant-X – Living Soil Intelligence System

Jan 2026 – Feb 2026

Solar-Powered IoT Soil Health Monitoring Platform

ESP32 · Embedded C/C++ · Multi-Sensor Integration · OLED Display · IoT Firmware

- Designed and built a solar-powered **IoT monitoring system** integrating multiple sensors to track soil health, plant bio-signals, and environmental conditions in real time.
- Developed an **ESP32-based data fusion engine** computing a proprietary **Soil Alive Index™** for smart irrigation decisions, with integrated OLED display, embedded firmware, and a remote monitoring dashboard.

LEADERSHIP & INITIATIVES

Technical Session Presenter

Sep 2025

Mastering AI: Prompt Engineering & Human Insight · St. Joseph College (Autonomous), Tiruchirappalli

- Delivered a technical session on **Prompt Engineering** and responsible AI practices to students, conducting live AI demonstrations and sharing best practices — driving awareness of emerging AI capabilities and ethical considerations.

AWARDS & HONOURS

1st Prize – Hackathon 2025 (Rs. 2,000)

Aug 2025

Developed a Trichy Local Farmers Connect Platform linking farmers, producers, and consumers for fair pricing and direct sales · St. Joseph College (Autonomous)

Outstanding Student Award – Department First Rank

Dec 2023

Achieved Department First Rank consistently across Semester 1 through Semester 5 · St. Joseph College (Autonomous), Tiruchirappalli

CERTIFICATIONS & COURSES

Project Execution: Running the Project

Feb 2026 – Present

Google · Coursera

Programming in Java

Jul 2024 – Nov 2024

NPTEL · IIT

Data Science for Engineers

May 2023 – Sep 2023

NPTEL · IIT
