PROFILE

Full-stack Software Engineer experienced in designing and deploying scalable web applications using modern technologies including React, Node.js, and database systems. Strong problem-solver with a builder mindset, focused on writing efficient code, optimizing performance, and delivering high-quality user-focused software solutions.

PROFESSIONAL EXPERIENCE

FrontierWox.in

Full Stack Developer Intern

05/2025 – Present | Tamilnadu, India

- Refactored and optimized the main website of FrontierWox Tech, improving UI responsiveness, performance, and overall user experience.
- Designed, developed, tested, and deployed a full-stack Resume Builder web application using React, Tailwind CSS, JavaScript, and PHP with dynamic template rendering and PDF export functionality.

PROJECTS

E-Commerce Website

Saree Shop

01/2026 – 02/2026

- Built and deployed a full-stack Saree E-Commerce application using the MERN stack with secure authentication, product management, and order processing APIs.
- Developed responsive UI and managed end-to-end deployment including database integration, server configuration, and version control.

SKILLS

Technical Skills

- **Programming Languages:** Python, Java, JavaScript
- **Frontend:** HTML, CSS, React.js, Tailwind CSS, GSAP
- **Backend:** Node.js, Express.js, FastAPI, Flask, REST APIs, JWT Authentication
- **Databases:** MongoDB, MySQL, Supabase
- **IoT & Embedded Systems:** ESP32, Sensor Integration, Embedded C/C++
- **Tools & DevOps:** Git, GitHub, VS Code
- **Cloud & Deployment:** Vercel, VPS Deployment

Soft Skills

- Leadership
- Problem Solving
- Critical Thinking
- Team Collaboration

Leadership & Initiatives

Technical Activity

Mastering AI: Prompt Engineering & Human
Insight

09/2025 | St. Joseph College (Autonomous)

- Presented a technical session on prompt engineering and responsible AI, demonstrating practical AI applications and best practices to students.

E-Commerce Website

Book Store

02/2026 – 02/2026

- Built a scalable Book Store E-Commerce platform with a responsive interface enabling users to search, browse, and purchase books seamlessly.
- Developed backend logic and RESTful APIs for authentication, product catalog, shopping cart, and order processing while designing efficient database structures for reliable end-to-end transactions.

ElectroPlant - X

Living Soil Intelligence System

01/2026 – 02/2026

- Designed and built ElectroPlant X, a solar-powered IoT soil intelligence system integrating multiple sensors to monitor soil health, plant bio-signals, and environmental conditions in real time.
- Developed an ESP32-based data fusion system to process sensor inputs and compute a Soil Alive Index™ for smart irrigation decisions, with integrated firmware, OLED display, and monitoring dashboard.

INTERESTS

- Chess
- Exploring new Technologies
- Story-driven games

LANGUAGES

Tamil — Native/Bilingual

English — Proficient

AWARDS

HACKATHON-2025

St. Joseph College (Autonomous)

01/08/2025

- 1st Prize - St. Joseph's College Hackathon (₹2000) for developing a Trichy Local Farmers Connect Platform that links farmers, producers, and consumers for fair pricing and direct sales.

Outstanding Student

St. Joseph College (Autonomous)

01/12/2023

Achieved Department First Rank consistently from Semester 1 through Semester 5

COURSES

Project Execution : Running the project

Google

02/2026 – Present | Thanjavur

Programming in Java

NPTEL

07/2024 – 11/2024 | Tamilnadu, India

Data Science for Engineer

NPTEL
