PROFILE

I'm a code-driven problem solver with a builder's mindset, blending curiosity with creativity. Whether it's scripting automation at 2 AM or reverse-engineering open-source projects just for fun, I thrive on turning abstract tech concepts into functional, real-world solutions. Currently diving deep into full-stack development, AI integration, and systems architecture—one bug at a time. Seeking an internship where I can contribute bold ideas, ship clean code, and grow through engineering challenges no textbook ever covered.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

Freewilltechnologies.in

05/2025 – Present

Tamilnadu, India

- Developed and Tested a Finance and GameHub Website using HTML, CSS, JavaScript and Python
- Developed, Tested and Deployed a Resume Builder Web Application using React, Tailwind CSS, JavaScript and PHP

SKILLS
